The recent naval appropriation bill authorized the appointment of two midshipmen at large, for each State; to be selected by its two senators.

The navy department, by arrangement with the civil service commison, will have examined young men, designated by Senators, on the 11th of August at either Greenville, Columbia, or Charleston. This saves the expense of travel to Annapolis for the entrance mination heretofore held there. The examination papers are prepared by the academic board at Annapolis, there will be no examination on entrance to the academy except a physi-

In order to make sure that there shall be no vacancy, each Senator is authorized to designate six young men, one as principal and the others as first, second, third, fourth and fifth alternates. If the principal fails the others take his place by succession, in their order. In order to afford an opportunity for the best talent in our State to the prize. I have decided to have a win the prize, I have decided to have a competitive examination held in the te House at Columbia on Monday. July 28, beginning at 9 o'clock a. m., to select a principal and five alternates. Those selected will appear before the examiners of the civil service commissioners on the 11th of August, after having been nominated by me to the navy department. No one will be per-mitted to enter the examination who is not physically sound, as it would only cause a waste of time. No student only cause a waste of time. No student who has been expelled from college and none but bona fide white residents of the State need apply.

All applicants for examination will

report promptly to the board of examiners to be appointed hereafter and announced through the papers at the hour and place designated. The board will prepare the examination papers and hand them out that day.

and hand them out that day.

The scope of the examination is afollows: Reading, writing, spelling,
arithmetic, geography, English grammar, U. S. history, world's history,
algebra through quadratic equations,
and plane geometry (five books of
Chauvenet's Geometry, or an equivalent.) The age limits are from 15 to 20

For the information of candidates the following is quoted from the regu-lations:

### SPECIAL ANNOUNCEMENT. THE CAMPAIGN MEETINGS. CHANGE YOUR CHARACTER.

It Can Be Done By Developing the Right Brain Cells.

A woman asks me if "it is possible for one's character, disposition or per-sonality, to be entirely changed." She

"Of course, I believe one's whole future, or the future life of one, may be modified or changed in certain respects, but I also believe that the characteristics born and bred into one can not be entirely changed."
Professor Elmer Gates, of Washing-

White Lawns, Embroideries and Laces & viciousness and laziness to morality

If the hurrying, thoughtless world would only pause long enough to conider what such a discovery means to civilization we might in another generation or two do away with our awful prisons, which are less than schools for crime, and substitute a great scientific institution under government control, where characters could be created for those born without them.

I have a letter from a prisoner who tells me he was for six years deprived of communication with any one save associate criminals and keepers, and was allowed no reading matter during that time.

Whatever this man's natural disposition, such a blind and stupid method of punishment could only result in making him still more criminal-since all crime is the result of an undeveloped nature—undeve'oped in its best brain cells.

Had he been given good, cheerful, wholesome books to read-allowed to converse with moral people an hour each day-given the care of a plant and an animal and talked to concerning its dependence upon him, and taught to think of it as something of his own—surely "justice" would have lost nothing and the man's better nature would have gained something.
